

HamedRodriguez
architects

Alejandro's professionally collaborates in Design with Hamed Rodriguez Architects Inc. in Coral Gables Florida.

His studio work embraces spatial and material resourcefulness, optimistic skepticism, and integrated constructability to discover untapped utility in diverse project types and scales.

His approach won him the 2024 Lyceum Fellowship's first place prize, which sponsored three months of travel abroad to plan and conduct an independent architectural research project. His research explored how the Dutch have channeled adversity into opportunities across scales and sought to understand the enduring principles of Dutch design —particularly its focus on sustainability and accessibility, to assess how those principles might be relevant or useful elsewhere.

He was also awarded the AIA Florida Bronze Medal in 2024 and Charlan Brock Architect's First Place Prize for his studio work from the Spring of 2023. He served as production editor for Vorkurs VIII: Void, UF's annual graduate level architectural publication, for which he worked with a diverse array of prominent collaborators in academia and in practice, including Robert McCarter, Atelier Mey, and Nat Chard.

ALEJANDRO RODRIGUEZ

ARCHITECTURAL DESIGNER
