

HamedRodriguez  
architects

Andres began his architectural journey at HRA as an intern in the summer of 2018, where he was introduced to drafting principles using AutoCAD and gained experience producing essential architectural drawings, including plans, sections, and details. He also assisted with field measurements and the creation of as-built drawings.

In 2020, Andres expanded his hands-on knowledge by working on the renovation of a family member's home. This experience allowed him to learn key construction techniques such as wall framing and drywall installation, deepening his understanding of building practices—knowledge he now applies daily in his current role at HRA.

His academic background includes coursework in Architectural Communications, Architectural Drawing, and Computer-Aided Drafting, completed at Miami Dade College and the University of Florida.

After contributing to projects during summer and winter breaks over the years, Andres joined HRA in a more permanent capacity in July 2023. Since then, he has worked on both residential and commercial projects, focusing primarily on the development of construction drawings.

ANDRES RODRIGUEZ

ARCHITECTURAL DESIGNER

EDUCATION | EXPERTISE

- 3+ Years of Experience
- University of Florida
- MDC / Associate in Arts

275 Minorca Avenue,  
Coral Gables, FL 33134
