

HamedRodriguez  
architects

Hamed Rodriguez achieved a Masters of Architecture Degree from the University of Florida in 1995, is a recipient of the AIA Hendry Adams Medal and is a Florida registered architect and LEED Approved Professional. Experienced over 30 years with firms such as Perkins & Will and STH (a Leo Daly Company) and with own firm credited with designing the first LEED Gold building in Dade County.

Areas of expertise are in commercial and residential architectural and interior design, land planning, sustainable consulting, building analysis reports and energy cost reduction strategies. Responsibilities include overseeing each project from schematic design to construction documents and administration. Other experiences include detailing and extensive knowledge of building codes and government regulations.

Other attributes include the ability to take the concept into technical reality. Listening to the client and translating the information along with the requirements of all the consultants has proved to lead production teams to project completion on time and within the client's expectation.
