

HamedRodriguez
architects

Yannique joined the HRA team in 2018 as an architectural designer, and has now been with the firm for over five years. During this time, she has become an integral part of the team, bringing a strong background in design and architecture. With a deep knowledge of current architectural and design software, she stays at the forefront of the industry's technological advancements.

Her journey in architecture began with a two-year internship in the hospitality sector back in the Caribbean Islands, where she gained valuable hands-on experience in the field. She then pursued her Master's degree in Architecture, further refining her skills and deepening her understanding of the discipline. Passionate about the impact architecture can have on society, she is driven by a belief that design should be both socially and environmentally conscious, with the power to truly enhance the lives of those who experience it.

A skilled rendered, she excels at bringing projects to life with her vivid and detailed visualizations, helping clients and team members alike see the potential of each design from the very beginning. Her combination of technical expertise, creative vision, and commitment to impactful design makes her an invaluable asset to the HRA team.
